

**Course Title:** Almond Nitrogen Management

**Course Type:** Video (Recorded Presentation)

**Course Topic:** Almond Nitrogen Management (Plant Nutrition)

**Course Description:** This discussion, led by Sebastian Saa, covers nitrogen management for almond production in California. Starting with the basics, the presentation dives into the 4Rs of nitrogen management: right rate, right time, right place, and right source to maximize nitrogen use efficiency. The presentation then covers early leaf sampling as a new nitrogen management monitoring tool. Sebastian also covers other tools that are available to almond growers through the Almond Board of California to help guide their nitrogen management decisions.

**Course Length:** 60 minutes

**Course Content Contributor(s):** Sebastian Saa (Almond Board of California, Senior Manager, Agricultural Research) and Parry Klassen (East San Joaquin Water Quality Coalition, Executive Director)

**Course Presenter:** Sebastian Saa (Almond Board of California, Senior Manager, Agricultural Research)
